## Projects

- College Management System(Academic Project)**
  - Technologies:** HTML, CSS, Bootstrap, JavaScript, PHP, MySQL.
  - Description:** A web-based application that streamlines academic and administrative tasks for administrators, teachers, and students, reducing manual paperwork and improving efficiency.
  - Key Features:**
    - Admin Module:** Manage departments, courses, faculty, and student registrations.
    - Teacher Module:** Upload attendance, manage assignments, and evaluate student performance.
    - Student Module:** View attendance, academic results, notices, and submit assignments online.

4. **Responsive Design:** Mobile-friendly interface using Bootstrap.

5. **Database Management:** Secure and efficient data handling with MySQL.

**My Contribution:** Designed and implemented the entire system, including front-end, back-end, and database architecture.
